The Top 5 reasons to purchase the ARCHOS Safe-T mini:

- The ARCHOS Safe-T mini is immune to computer viruses.
- Private and recovery keys are stored on the ARCHOS Safe-T mini, offline, and can therefore not be hacked.
- Only its users see these keys entirely on the OLED screen of the ARCHOS Safe-T mini.
- All transactions must be validated with the hardware buttons of the ARCHOS Safe-T mini. It is thus impossible for cybercriminals to modify them.
- In case the user loses its ARCHOS Safe-T mini, he can recover his coins using its 24-word seed.

ARCHOS has built a dedicated team around the security and blockchains. This team will maintain the ARCHOS Safe-T mini and will publish regular updates with additional supported cryptocurrencies.
