

ARCHOS GamePad Now Available

The first true Android games console, the ARCHOS GamePad combines powerful tablet hardware with revolutionary gaming software

London, UK – December 6th, 2012 - [ARCHOS](#), an award-winning innovator in consumer electronics, announces the retail availability of the highly anticipated GamePad, a new type of tablet that combines gaming controls with Android™ for a full tablet and gaming experience in one. Gamers will not only have access to all their favourite games, they will also have access to email, Internet, apps and more through one device. A thin and light Android 4.1 Jelly Bean device, the Gamepad also features full access to Google Play™ and Google Mobile Services and is available for £129.99 starting from 6th of December from the [ARCHOS online store](#).

“Android device users spend more than 9 hours a month gaming on their devices and yet are not completely satisfied with the touch-screen experience,” says Henri Crohas, Founder and CEO of ARCHOS. “We feel this area of gaming is proven and will continue to grow. With the introduction of the GamePad we are uniquely positioned to feed the demand of gamers who want a better gaming experience on a tablet.”

The GamePad features a 16 million color, seven inch, five point capacitive, 1024 x 600 pixel screen, physical control buttons and analogue sticks. The Google certified tablet has full access to Google Play™

for the tens of thousands of games available and **runs a 1.6 GHz dual-core processor combined with a Mali 400mp quad-core GPU.**

By combining the GamePad's 14 physical buttons and dual analog thumb-sticks with the revolutionary ARCHOS game mapping tool (exclusive to ARCHOS), the GamePad brings the physical aspect back to the gaming experience. In addition, at only 10 mm (0.3 inch) thin and with a weight of 330g (0.7 lbs), the ARCHOS GamePad is the perfect on-the-go gaming console.

REVOLUTIONARY MAPPING TOOL

Thanks to the revolutionary ARCHOS mapping tool, even back catalog games that weren't made for physical controls can work with the physical controls of the ARCHOS GamePad; 'map' any on-screen virtual control to the physical controls of the GamePad for hundreds of games within the tool or use its drag-and-drop interface to 'map' any game in seconds.

Check out our YouTube video showing how easy it is to use: <http://youtu.be/rgsJ7gUK1cA>

The mapping profile for each game is automatically saved so whenever that game is launched in the future, the ARCHOS game mapping tool will automatically load the corresponding mapping profile.

FEATURES & SPECS

Operating System: Google Certified Android 4.1 Jelly Bean

Smooth Gaming Experience with 3D Graphics: Quad-core Mali 400 MP GPU paired with a 1.6GHz Dual-core CPU.

ABOUT ARCHOS

ARCHOS, pioneer in the portable audio and video player market, and now specializing in Android Tablets, has repeatedly revolutionized the market for consumer electronics since 1988. Today, ARCHOS offers Android Tablets, Tablet PCs and MP3/MP4 players. In 2000, ARCHOS launched the Jukebox 6000, the first MP3 player combined with a hard disk. Then in 2003 ARCHOS introduced the first portable multimedia players with TV recording. In 2006 Wi-Fi is implemented and then touch screens in 2007. In 2008, ARCHOS launched the first generation Internet Tablets, and then the first ever Android powered tablets in 2009. ARCHOS has offices in the United States, Europe and Asia. ARCHOS is quoted on Compartment B of Euronext Paris, ISIN CodeFR0000182479. Website: www.archos.com.
