ARCHOS unveils a comprehensive line-up for easier and greener journeys

ARCHOS Urban eScooter, ARCHOS Bolt, ARCHOS X3

London – Monday, February 27th, 2017 – Throughout Europe, the continuous development of cities where most of the journeys begin and end creates a situation that is not sustainable: population have to deal with severe congestion, poor air quality, and noise emissions. With its connected Urban Mobility line-up, ARCHOS chooses to favor a transport mode that is more efficient and more environmentally friendly.

On one side, digital connectivity increases road safety, traffic efficiency, including shared and automated vehicles. On the other side, innovation in batteries, fast charging capabilities, and power-driven technology makes electric vehicles a viable alternative.

“At ARCHOS, we are all convinced the combination of Digital Tech and Electricity can disrupt urban mobility for a greener place to live in. We have been working for several months on new connected mobility solutions and on clean energy vehicles. We have concluded partnerships with the most innovative companies and we are sharing our R&D expertise every day. As a result, we are proud to unveil at this year’s Mobile World Congress a comprehensive line-up.” declares Loïc Poirier, CEO of ARCHOS.

ARCHOS Urban eScooter

The ARCHOS Urban eScooter is a true commute companion. Light and easy to fold, it can reach a maximum speed of 20 km/h and last up to 25 km. It can even climb 15° slopes. It is a very easy-to-use device: one button to accelerate and another one to break. It offers all the functionalities of the standard scooter: headlight, kickstand and footrests. The double damping system and the EBS break make it particularly safe on the road. The ARCHOS Urban eScooter is fully electric and can be 100% recharged on any power outlet in only 180 minutes. Moreover, its companion app allows to instantly knowing the speed and the battery status of the vehicle.

- Easily foldable and storable almost anywhere
- 25 km of battery life
- Up to 20 km/h
- Light; 14.15 kg with battery
- 15° climbing angle
- Double damping system

ARCHOS

ARCHOS Bolt

The ARCHOS Bolt is a real piece of technology made with high-end aluminum alloy, durable and resistant materials. Foldable in a snap, it is compact and light (8kg). It can reach a maximum speed of 10 km/h: the right balance between speed and safety. Easy to operate, the max speed can be adjusted right from the handle bar. In addition to the back wheel brake, the engine break stops it very quickly. It can support up to 90kg. The LED screen keeps track of the kilometers travelled and the battery status.

- Easily foldable
- 10 km of battery life
- Up to 15 km/h
- Light; 8.28 kg

ARCHOS X3

Quiet and clean with no CO2 emission, the ARCHOS X3 is the answer to rising energy cost and crowded cities. Its electric engine (1 kW – equal to a 50 cm³) provides unique driving sensations, without requiring any motorcycle license. It delivers maximum power instantly and the max speed is reached in approximately 3sc. It has a stylish matt black finish color to fit into the traffic and comes with a top case to store a helmet. It has an average autonomy of 60Km in an urban driving environment. It's truly simple to recharge it through any electric plug (220V) in approximately 6 hours before getting back on the road.

- Fully Electric
- No Maintenance, No Gas, No Oil, No CO₂
- Less than 0,50€ for 100KM
- Top case included
- European Certification for one seat
- Elegant Matt black color

The ARCHOS Urban Mobility line-up will be exhibited on ARCHOS's booth at MWC 2017 (Hall 6, Booth #B60). The ARCHOS Urban eScooter is already available in stores. Exact specifications, prices, and availabilities for the ARCHOS Bolt and the ARCHOS X3 will be specified when the vehicles are launched, in April 2017.

ARCHOS

About ARCHOS:

ARCHOS, a pioneer in consumer electronics, continues to innovate and revolutionize the consumer electronics market. Among others, the French manufacturer was first with an HDD MP3 player in 2000, a multimedia player in 2003; Google Android powered tablets in 2009, a connected Smart Home in 2014 and PicoWAN, the first collaborative network dedicated to the IoT, in 2016. Today, ARCHOS offers its own line of tablets, smartphones and connected objects worldwide. It also markets and distributes high-value innovative products associated with the tablet and smartphone markets: urban mobility, smart entertainment. With headquarters in France, offices in Europe and in Asia, ARCHOS has become a strong pan-European player and is furthering its international expansion. ARCHOS is quoted on Compartment C of Eurolist, Euronext Paris, ISIN Code: FR0000182479.
