

ARCHOS: A complete range for Education

London, 23rd February 2015: ARCHOS, the French Consumer Electronic brand, is taking part in the "Grand Digital for Schools Project" which aims to equip 50,000 middle and secondary school students in France with tablets and computers by the end of 2015 increasing to more than 1 million per year from 2016 onwards. The French tech-company hopes to support the national education system with its skills set and innovation, and has already equipped several institutions. ARCHOS now offers its partners a range of tablets and laptops in line with the needs of schools, teachers and students.

A product offer tailored to the Education sector.

Following a round of meetings with General and Regional Councils, ARCHOS will today announce its Education range of devices, aiming to meet the requirements of the education market.

A complete product range: The range consists of two tablets with high definition displays in 9" or 10", customisable on demand. The tablets' range is powered by an Intel processor, 2GB of RAM and at least 64GB of internal memory and runs either Windows 8.1 or Android.

With a demand for laptops in the education sector, ARCHOS has decided to incorporate two laptops in its offer, one in 11.6" running Google Chrome OS and the other 14" running Windows 8.1 Education Pro.

Ergonomic design: All tablets are supplied with a keyboard dock for extra easy use by students.

Protection: Education range tablets and notebooks are designed to be extra hardy and feature a unique protective cover designed and developed to withstand being transported.

Battery life: The battery of the products has been adapted to last the full school day. Tablets or laptops can be used more than 8 hours without recharging.

Optional extra warranty and customer hotline: the standard warranty for the Education range is 2 years. During this period ARCHOS offers an optional guarantee that lets users get a brand new tablet in the event of breakage not covered by the standard warranty. Users will also have access to a dedicated hotline tailored to answer all the specific questions that the education sector may have.

Basic Configuration and Price of the basic module:

Screen Size	9" (Tablet)	10.1" (tablet)	11,6" (Notebook)	14" (Notebook)
CPU	Intel - Quad Core 1.8 Ghz			
OS	Windows 8.1 Pro or Android		Chrome OS	Windows 8.1 Pro
RAM/Flash	2GB / 64GB			4GB / 250 GB
Camera	VGA / 2MP		VGA	
Battery Life	> 8 hours			
Keyboard	Detachable		Integrated	
Warranty	2 years (1 year extra warranty available)			
Price (exc. VAT)	200€ excl. tax	250€ excl. tax	250 € excl. tax	300€ excl. tax

Each institution can choose the required software and the screen size according to its needs.

A customised offer

To meet the specific features and demands of the different education boards, devices and software can be fully customisable.

For example, the tablet and its protective cover will be customised in the colours of each education board: casing, council logo, in addition to a hardware security solution will be offered to each institution.

ARCHOS and local integrators will work together with partners on the following customised solutions:

- **Applications Kiosk:** For Android tablets, ARCHOS will offer an applications Kiosk grouping together the best education applications available on the Google Play store. The educator can easily access content adapted to their curriculum and lessons.
- **Content Preload:** ARCHOS will let each academy create their own digital work space by preloading links to their own work space on each tablet or computer.
- **Fleet management:** Solutions adapted to allow local administrators to manage the installed tablet or notebook remotely.

In early March, ARCHOS will post an education section on its website to enable stakeholders to express their request.

About ARCHOS

ARCHOS, a pioneer in the portable audio and video player market, and now specializing in Android Tablets and Smartphones, has repeatedly revolutionized the market for consumer electronics since 1988. Today, ARCHOS offers its own line of Android Tablets and Smartphones, as well as a full line of OEM devices. In 2000, ARCHOS launched the Jukebox 6000, the first MP3player combined with a hard disk. In 2008, ARCHOS launched the first generation Internet Tablets, and then the first ever Android powered tablets in 2009. In 2013, ARCHOS launched its first generation of Smartphones with the ARCHOS Platinum series. ARCHOS has offices in the United States, Europe and Asia. ARCHOS is quoted on Compartment C of Eurolist, Euronext Paris, ISIN CodeFR0000182479. Website: www.archos.com.
