

ARCHOS SafeT touch available for immediate shipment to crypto enthusiasts seeking a trustworthy ecosystem from one ultra-secure dedicated device

Paris – Wednesday, September 11th, 2019 – After 2 years of heavy R&D, ARCHOS announces today its new hardware wallet is available at €129 on archos.com for immediate shipment and on amazon.com in a few days. The ARCHOS SafeT touch provides crypto traders with the most complete solution, allowing them to both safeguard their assets and manage their investment portfolio easily from one single ultra-secure device.

The report published by Chappuis Halder in June 2019¹ concludes that there are more than 40 million active crypto enthusiasts across the globe, including more than 10 million Europeans, with an average monthly BTC trading volume estimated to 46 737 transactions in this region.

One of the main threat crypto traders are exposed to is the theft of their assets. In its Q2 2019 report², Ciphertrace, the leading crypto currency intelligence firm, confirms cybercriminals looted \$125 million in Bitcoin, Ethereum and other digital assets from exchanges last quarter.

ARCHOS

Security at the highest level

The ARCHOS SafeT touch consists in a hardware wallet with state of the art security by design:

- A secure element, tamper-resistant, to store private keys in a safe digital vault.
- A secure transaction-specific execution area, running a certified EAL7 secure operating system, developed in partnership with Prove & Run, a leading company in cybersecurity for connected devices and embedded systems.
- This dedicated operating system has been solely designed to run mission-critical applications and to protect against cyberattacks, even the most sophisticated ones.
- A Trusted User Interface and a Trusted Indicator are automatically activated right at the triggering of sensitive actions, for a superior protection.
- A secure Bluetooth Low Energy stack inside the secure operating system, its activation for synchronization being notified to the user by the navigation button blinking in blue.
- A mandatory 6 digits PIN code (the ARCHOS SafeT touch locks out after 4 wrong passwords attempts).
- A fingerprint reader that locks / unlocks the hardware wallet exclusively by its owner.

In case the ARCHOS SafeT touch is broken, lost or stolen, the holder benefits from a back-up thanks to the recovery seed of 24 words.

“All-in-One” device

The ARCHOS SafeT touch eases the trade of crypto assets, by getting the right information, buying and exchanging crypto currencies, storing them, all from one ultra-secure dedicated device.

Thanks to its touch screen and its intuitive graphical user interface, the ARCHOS SafeT touch provides crypto enthusiasts with a complete ecosystem enabling a full range of services:

- Check balances thanks to graphic views of crypto currencies’ evolutions, instant portfolio composition and capital allocation.
- Purchase crypto assets with VISA, SEPA.
- Swap coins directly on the device while limiting users’ risk related to malfunction of the exchanges or centralized hacks.
- Manage peer-to-peer transactions using QR codes.

ARCHOS

The ARCHOS SafeT touch offers a virtually unlimited storage capacity and is compatible with the major coins at launch: Bitcoin, Bitcoin Cash, Bitcoin Gold, Dash, Dogecoin, ERC20, Ethereum, Ethereum Classic, Litecoin, ZCash.

The ARCHOS team will continue working on upgrades for an extended multi crypto compatibility.

The ARCHOS SafeT touch is available at €129 on archos.com for immediate shipment and on amazon.com in a few days.

ARCHOS might also consider adding more features to its platform allowing crypto traders to get access to key blockchain related B2B as well as B2C services within the framework of an STO (Security Token Offering): personal data records including blockchain-based credentials for certified IDs, title deeds, claims management, etc.

About ARCHOS

ARCHOS, a pioneer in consumer electronics, continues to innovate and revolutionize the consumer electronics market. Among others, the French manufacturer was first with an HDD MP3 player in 2000, a multimedia player in 2003, Google Android powered tablets in 2009, a connected Smart Home in 2014 and PicoWAN, the first collaborative network dedicated to the IoT, in 2016. Today, ARCHOS designs and democratizes solutions with high innovation value in three segments: smart devices, AI & IoT, blockchain. ARCHOS is listed on Compartment C of the regulated market of Euronext Paris, ISIN Code: FR0000182479.
