ARCHOS SAFE-T mini: secure your cryptocurrencies

Paris December 2nd 2020 - ARCHOS offers cryptocurrency holders the Safe-T mini, a hardware wallet to store their private keys against any hacking attempt, at a price of € 14.99 including tax.

ARCHOS' promotion comes at a time when Bitcoin surpassed its all-time high at \$19,857 on last November 30th. It rose by 175% in 2020. Bitcoin and other cryptocurrencies are increasingly seen as a safe haven: *"Bitcoin could compete with gold as an 'alternative' currency in the coming years, as a new generation of investors take a growing share of the market"* JPMorgan analysts wrote.

It is therefore important that cryptocurrency enthusiasts can keep them securely in a secure hardware wallet. The ARCHOS offer will be available at € 14.99 including VAT starting on its web store and until December 31, 2020.

Le safe-T mini: designed and assembled in France

The ARCHOS Safe-T mini has been developed by ARCHOS R&D. The team provided its expertise in securing cold storage data, designing and developing the ARCHOS Safe-T mini. To ensure the process traceability, the device is manufactured in France.

The ARCHOS Safe-T mini guarantees high level of traceability or security and embeds:

- Encrypted chipset memory, in addition to its 6 digits PIN code.
- Open source software, based on the Trezor development, available on GitHub, where others can contribute further.
- Secure storage of repatriated crypto assets, after trading on any preferred exchange platform.
- Support of 75% of total market cap of cryptocurrencies: Bitcoin, Bitcoin Cash, Bitcoin Gold, Dash, Ether, Ether Classic, Litecoin, ERC20 tokens.
- Companion web app for easy set-up and use.

ARCHOS Safe-T mini: an ultra-safe hardware wallet

The Top 5 reasons to purchase the ARCHOS Safe-T mini:

- The ARCHOS Safe-T mini is immune to computer viruses.
- Private recovery keys are stored on the ARCHOS Safe-T mini, offline, and therefore cannot be hacked.
- Only its users see these keys entirely on the OLED screen of the ARCHOS Safe-T mini.
- All transactions must be validated with the hardware buttons of the ARCHOS Safe-T mini. It is thus impossible for cybercriminals to modify them.
- In case the user loses its ARCHOS Safe-T mini, he can recover his coins using its 24-word seed.

Availability and price

The Safe-T mini is available now on the ARCHOS website www.archos.com for € 14.99 including tax from December 2nd to December 31st, 2020.
