

ARCHOS Fusion Storage Now Available

Fusion Storage significantly increases data storage space in a mobile device by fusing internal and external memory

Paris – May 5, 2015 – [ARCHOS](#), a pioneer in Android™ devices, announces the availability of ARCHOS Fusion Storage, a revolutionary software that seamlessly combines the memory of any micro SD with the internal storage on a smartphone or tablet. Unveiled during MWC 2015, ARCHOS Fusion Storage is now immediately available via “Over-the-Air” (OTA) updates for ARCHOS device users.

Long-Awaited Feature

To create Fusion Storage, ARCHOS relied on over 25 years of experience in software development, particularly in the Android platform. ARCHOS’ R&D team focused on the lower layers of the Google operating system and its Kernel core, modifying its characteristics to allow automatic memory reconciliation and allocation. The result is increased capacity for Android tablets and smartphones through a seamless and safe transfer of information.

Key Features

ARCHOS Fusion Storage significantly increases the storage space on a device, allowing users to download more applications and store more content. Once installed and activated, Fusion Storage automatically sorts and organizes the information in a device, keeping application files in the internal memory and sending photos, data, videos, and more to the memory card.

In the event that the micro SD card needs to be removed or replaced, ARCHOS Fusion Storage can also be reversed. This guarantees that information can be seamlessly moved to and from the internal storage as many times as needed without any loss.

Availability

ARCHOS Fusion Storage technology is now available free of charge for ARCHOS 50 Diamond, ARCHOS 52 Platinum, ARCHOS 50 Oxygen Plus and ARCHOS 101 Oxygen users. All ARCHOS upcoming products, including the ARCHOS 62 Xenon and ARCHOS 59 Xenon will automatically feature this technology.

For more information about ARCHOS Fusion Storage and the entire selection of Connected Devices, Smartphones and Tablets, visit us at www.archos.com.

About ARCHOS

ARCHOS, a pioneer in the portable audio and video player market, and now specializing in Android Tablets and Smartphones, has repeatedly revolutionized the market for consumer electronics since 1988. Today, ARCHOS offers its own line of Android Tablets and Smartphones, as well as a full line of OEM devices. In 2000, ARCHOS launched the Jukebox 6000, the first MP3 player combined with a hard disk. In 2008, ARCHOS launched the first generation Internet Tablets, and then the first ever Android powered tablets in 2009. In 2013, ARCHOS launched its first generation of Smartphones with the ARCHOS Platinum series. ARCHOS has offices in the United States, Europe and Asia. ARCHOS is quoted on Compartment C of Eurolist, Euronext Paris, ISIN CodeFR0000182479. Website: www.archos.com
